Product fiche pursuant to Delegated Regulation (EU) no. 392/2012

Supplier's Name or Trade Mark Model MiHP70 Rated capacity in kg of cotton laundry for the standard cotton programme at full load Air vented, condenser or gas fired Heat Pump Energy efficiency class A+ Electric Only. The weighted Annual Energy Consumption "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the ow-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only. The weighted Annual Energy Consumption "Energy consumption per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryor or Non automatic tumble dryor EU Ecolabel (if applicable) Energy consumption of the standard cotton programme at full and partial load EU Ecolabel (if applicable) Energy consumption of the off-mode (if o) and on the left-on mode (if o) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in the of the standard cotton programme at full load (if dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Standard cotton programme at full and partial load" If the appliance is a condenser tumble dryer, the condensation efficiency class - "Standard cotton programme at full and partial load"	Tumble Dryers	Answer	Units
Model Rated capacity in kg of cotton laundry for the standard cotton programme at full load 7 kg Air vented, condenser or gas fired Heat Pump Energy efficiency class Are lectric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load The duration of the standard cotton programme at full and partial load The duration of the left-on mode if the appliance is sequipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard of the theory on the left-on mode if the appliance is sequipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard of the programme in terms of energy consumption or cotton The weighted programme in terms of energy consumption for cotton The weighted programme in terms of energy consumption for cotton If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient) If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficiency class - "Standard cotton programme at full and partial load"			Office
Rated capacity in kg of cotton laundry for the standard cotton programme at full load Air vented, condenser or gas fired Heat Pump Energy efficiency class At Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full and partial load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)"	Sapplies 5 . Id. He of Hidde Hidth		
Air vented, condenser or gas fired Energy efficiency class Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the eff-mode (P o) and on the left-on mode (P 1) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at mere of the standard cotton programme at mere time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	Model	MIHP70	
Air vented, condenser or gas fired Energy efficiency class Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the eff-mode (P o) and on the left-on mode (P 1) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at mere of the standard cotton programme at mere time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
Electric Only: The weighted Annual Energy Consumption "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load Dependent of the standard cotton programme at full and partial load Dependent of the eff-mode (P o) and on the left-on mode (P 1) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	Rated capacity in kg of cotton laundry for the standard cotton programme at full load	7	kg
Electric Only: The weighted Annual Energy Consumption "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load Dependent of the standard cotton programme at full and partial load Dependent of the eff-mode (P o) and on the left-on mode (P 1) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption per cycle will depend on how the appliance is used" Altomatic time the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used. Automatic time depend on how the appliance is used. Automatic time depend on how the appliance is used. EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load 2.25 / 1.2 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effciency class - "Standard cotton programme at full and partial load"			
Energy consumption of the standard cotton programme at full and partial load 2.25 / 1.2 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	Automatic tumble dryer or Non automatic tumble dryer	Automatic	
Energy consumption of the standard cotton programme at full and partial load 2.25 / 1.2 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	50.5 1.1.105 P. 11.3		
Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	EU Ecolabel (If applicable)		
Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	For any analysis of the standard authorized as full and analysis land	2.25 /4.2	LAAdh
The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	Energy consumption of the standard cotton programme at full and partial load	2.25 / 1.2	kwn
The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	Devices agreement in a fit to aff made (D.a.) and an the left on made (D.1) for the atomical	0.4.0.75	\A/
The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" B If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"		0.4, 0.75	vv
Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" B If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	cotton programme at run load		
Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	The duration of the left-on mode if the appliance is equipped with a power management		minutes
Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" B If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			illillutes
standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	3)30011		
standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	Indication that the "standard cotton programme" used at full and partial load is the	Yes	
this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	emotine programme in terms of energy consumption for cotton		
load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	The weighted programme time (T t) of the standard cotton programme at full and partial	244, 244, 140	minutes
standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"		,,	
cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	· ·		
If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
"Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
"Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"			
If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load"	If the appliance is a condenser tumble dryer, the condensation efficiency class -	В
