Product fiche pursuant to Delegated Regulation (EU) no. 392/2012

Supplier's Name or Trade Mark Model MD-HHH857GW21-EN Rated capacity in kg of cotton laundry for the standard cotton programme at full load Air vented, condenser or gas fired Energy efficiency class Electric Only. The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh Gas ery year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (if applicable) Energy consumption of the standard cotton programme at full and partial load : 1,91 kWh Half load : 1,91 kWh Half load : 1,91 kWh Half load : 1,07 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load Further duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard cotton programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full load (T dry) and the programme time (T t) of the standard cotton programme at full load (T dry) and the programme time (T the standard cotton programme at partial load (T dry) 1/2:113 min Tt: 146 min and the programme time of the standard cotton programme at full load (T dry) and the programme time (T the standard cotton programm	Tumble Dryers	Answer	Units
Rated capacity in kg of cotton laundry for the standard cotton programme at full load Air vented, condenser or gas fired Energy efficiency class A++ Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low - power modes. Actual energy consumption per cycle will depend on how the appliance is used" Sas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low - power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load : 1,91 kWh lalf load : 1,91 kWh Half load : 1,07 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (I't) of the standard cotton programme at full load (I'dry) and the programme time of the standard cotton programme at full load (I'dry) and the programme time of the standard cotton programme at full load (I'dry) and the programme time of the standard cotton programme at full load (I'dry) and the programme time of the standard cotton programme at full load (I'dry) and the programme time of the standard cotton programme at full load (I'dry) and the	Supplier's Name or Trade Mark		SHARP
Air vented, condenser or gas fired Energy efficiency class A++ Electric Only: The weighted Annual Energy Consumption - "Energy consumption" "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption" "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load : 1,91 kWh Half load : 1,91 kWh load Energy consumption of the off-mode (P o) and on the left-on mode (P l) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at partial load (T	Model		
Energy efficiency class Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption = "Energy consumption "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load Electric Education of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full load (T dry) and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full load" Noise Level (dB(A)) for the standard cotton programme at full load"	, , , , , , , , , , , , , , , , , , , ,		8 Kg
Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low - power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load and Half load: 1,91 kWh Half load: 2,107 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at partial load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient) in the standard cotton programme at full load (T dry) and the programme is a condenser tumble dryer, the average condensation efficiency class - "Standard cotton programme at full load" Noise Level (dB(A)) for the standard cotton programme	Air vented, condenser or gas fired		Heat Pump
consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low - power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer	Energy efficiency class		A++
"X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer Automatic tumble dryer or Non automatic tumble dryer Ele Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load: 1,91 kWh load Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most effcient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full load" Noise Level (dB(A)) for the standard cotton programme at full load To the standard cotton programme at full load Action Cupboard Dry 18 the standard cotton programme at full load The variation of the standard cotton programme at full load The variation of the standard cotton programme at full load The variation of the standard cotton programme at full load The variation of the standard cotton p	consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low power modes. Actual energy consumption per cycle will depend on how the		235 kWh/year
EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load: 1,91 kWh load Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full load" Noise Level (dB(A)) for the standard cotton programme at full load To the standard cotton programme at full load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To the value of the standard cotton programme at partial load To	"X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes.
